Ivan Saji Abraham

Student—Web Developer—Security Researcher

About me I was a person who was interested in tech from a very young age. My passion towards tech introduced me to the world of exploitation. I am a person who just not think out of the box, I just tear it apart. Mostly I am self taught. I learnt most contents from the Web. There was a turing point when I met my mentor Mr.Sai Satish who guided me and showed me the path.
